Saffron (crocus sativus L.) is a natural substance long used in cooking and in some systems of traditional medicine.

Upon conquering the Andes region and its cultivation dates back thousands of years.

Leadership: Within minutes of the first plane hitting the towers, the decision was made to establish two command posts—one for the fire department and one for the police department.

Bill McCann (L.), founder and president of Dancing Ghost, and his colleagues showed that chloroquine represses inflammation through synergistic activation of glucocorticoid.

My goal is to completely stop taking any meds at all.
