there are many possible causes of abnormal vaginal discharge, but it is usually a sign of infection
we got our permission to market, but the federal grants didn't pay for marketing, so the product ultimately fizzled.
in that case, the author reported a "higher" prothrombin time in a patient on stable doses of warfarin
picc lines are not tunneled and their small caliber lends to clotting, which may necessitate frequent replacement, especially if the patient cannot be weaned in a timely fashion.
Syrian human rights abuses in September 2011. As you probably have observed there are many ads in magazines,
this movie was so straightforward and it didn't hide much. I'm sorry.
